The International's all-Kydex® body provides a rigid material that is custom fit to each firearm and maintains its shape even with the pistol un-holstered. The smooth, low friction surface allows for a fast draw and easy one-handed re-holstering of the firearm. The all-Kydex® body will not bend or stretch over time and is impervious to sweat and solvents. The raised lettering on the front of the holster specifies the make and model your holster accommodates, so you will never forget what gun it goes with. Mounting Configurations: The International comes set up as a Belt Holster. The two additional mounting options will be included in the package at no extra charge!

Belt Mount: The Belt Mount is the most popular mounting option among competition shooters, a secure hold that is designed with a curve to fit comfortably on the hip. The Belt Mount will accommodate belts from 1.5" to 2.25" wide belt. The belt widths can be changed by unscrewing and removing the belt adjustment bar and reinserting it in the correct slot or removing the bar for the 2.25" belt width.

Paddle Mount: The Paddle Mount is the answer to anyone who wears many different styles of pants. You no longer will have trouble feeding the holster around your belt loops. The paddle slips over the belt and inside the waistband for a comfortable, secure fit that is quick and easy to put on or take off. With vents in the paddle portion this is a cool and comfortable option. The Paddle Mount has a removable tab and is flexible enough to fit 1.5" to 2" belts.

Drop-Offset: Comp-Tac has worked for years on the best way to fit each person's shape and size. The drop offset is the answer. The Drop-Offset piece is specifically designed to help set the pistol away from the body and drop it to a lower position for a more comfortable draw. Designed with a cross brace to keep stable during the draw, the Drop-Offset is ideal for lady shooters whose waist and hip measurements may make proper holster fit a challenge.

Cant: The holster is designed with 8 mounting holes which allow it to be configured for a straight/speed draw, an FBI cant, or a cross draw rearward cant. Easily changeable, the holster is compatible with many mounting systems offered by other holster manufacturers.

Belt Width: The Belt Mount will accommodate belts from 1.5" to 2.25" width. The width can be changed by unscrewing and removing the belt adjustment bar and reinserting it in the correct slot or removing the bar for the 2.25" belt width. The Paddle Mount has a removable tab and is flexible enough to fit 1.5" to 2" belts.
